LALIT CHAUDHARI

Pune, India | chaudharilalit16@gmail.com | +91-8177975128 | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Motivated M.Sc. Industrial Mathematics with Computer Applications student with a strong foundation in Python, Machine Learning, Deep Learning, Statistics, and NLP. Hands-on experience developing AI/ML projects using Scikit-learn, PyTorch, Pandas, NumPy, and DistilBERT, along with practical knowledge of data analysis, feature engineering, and model evaluation. Also experienced in Java, Spring Boot, SQL, and full-stack application development. Strong problem-solving and analytical skills with an interest in applying machine learning and mathematical concepts to real-world problems. Seeking opportunities in AI/ML, Data Science, and research-oriented roles.

Skills

Programming Languages: Java, JavaScript, Python, C, C++.
Machine Learning: Machine Learning, Deep Learning, NLP, Classification, Regression, Feature Engineering, Model Evaluation.
Data & Statistics: Pandas, NumPy, Scikit-learn, Matplotlib, Statistics, Exploratory Data Analysis (EDA).
Deep Learning & NLP: PyTorch, DistilBERT, Transformers
Databases: MySQL.
Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Postman.
Core CS Concepts: OOP, Data Structures & Algorithms, DBMS, Computer Networks, Operating System.
Soft Skills: Team Collaboration, Communication, Analytical Thinking, Problem Solving.

Education

- **M.Sc. Industrial Mathematics with Computer Application** — Expected Jul 2027
  Fergusson College, Pune — First Year Grade: 6.8

- **B.Sc., Mathematics, Computer Science & Electronics: CGPA – 6.8** — 2022 – 2025
  St. Francis De Sales College, Nagpur

Projects

AI Phishing Detection: Hybrid Scam Analysis System | *Research Project* | Machine Learning, NLP, Distilbert , Scikit-learn, pytorch .

- Problem: Detect whether an SMS/message is legitimate or potentially phishing/spam.
- Used a labeled SMS dataset containing legitimate and malicious/spam messages.

SQL Validator – Query Validation Tool | *Python, SQL* (github)

- Developed a Python-based SQL query validator that checks syntax, SQL keywords, and table/column names.
- Generated meaningful validation error messages to help users fix queries before execution.
- Improved developer productivity by catching common SQL errors at input stage rather than at runtime.

Ad Exposure Count Prediction – ML Predictive Model | *Python, Pandas, Scikit-learn* (github)

- Performed EDA and feature engineering to identify key variables affecting ad exposure counts.
- Applied statistical testing and trained predictive models to forecast ad exposure with measurable accuracy.

Course and Certifications

- LeetCode Problem Solver – Solved 70+ problems across arrays, strings, and dynamic programming.

Extracurricular Activities

- Japanese Language - Currently preparing for the JLPT N5 (Japanese Language Proficiency Test).
- Basic conversational Japanese (Hiragana, Katakana, basic Kanji, grammar, and vocabulary)

- Programming Mentor at Disha Computer Institute – guided students in debugging and project development.
- Conducted group coding sessions and prepared structured learning materials for 30+ students.

Languages

English • Hindi • Marathi • Japanese (Basic)
